-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 5 refers to "the panel of tubes can be put into traction between the divider and the ceiling of the furnace" which renders the claim indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Belin et al (6532905). Belin et al shows two hearths (14, fig. 11) separated by a divider in the bottom portion of the furnace, and at least one panel (42, fig. 11) of heat exchange tubes, the furnace being characterized in that the panel of tubes is disposed vertically above said divider and perpendicularly to the longitudinal direction of said hearths (fig. 1) a row of panels of tubes spaced regularly from one another along said longitudinal direction (fig. 2, col. 5, lines 4-7), the tubes forming a panel extend the tubes forming the divider (56, fig. 1, fig. 2), alternating panels (6A) whose tubes extend the tubes forming the divider, and panels whose tubes are connected to

manifold disposed within the divider (col. 5, lines 4-7, Item 56 has length width and depth that would require multiple panels.).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art with respect to fluidized bed heat exchanger and panels in general: Bishop (3387590), Kwon (4314967).
